Bangkok, Thailand

SKILLS

Engineering

Python · FastAPI · PostgreSQL · SQL · TypeScript · JavaScript · React · Tailwind CSS · REST APIs · C

Data & Business

Tableau · pandas · Streamlit · Jupyter · Excel · Data Visualization · Clustering · Business Analysis · Market Research

Quality & Tools

Playwright · Robot Framework · Bruno · Git · GitHub Actions · Render · Vercel

STRENGTHS

Fast learner
Picked up Tableau for client work in about 1.5 weeks

Clear communicator
Presented to clients and to central bank directors

Business sense
Grew up around a family business; builds tools for real operations

Patcharapon Srisuwan

Full-stack Developer · Business & Data Analyst

Computer Engineering and Digital Technology student at Chulalongkorn University who works where software meets business. I start from real operational problems and build the software or analysis that fixes them, with internship experience at the Bank of Thailand and The Red Carbon.

EXPERIENCE

Data Analyst Intern · Bank of Thailand
Jun – Jul 2026

Data Team, Payment Systems and FinTech Department · Bangkok

- Assessed the data quality of the team's datasets and presented the findings
- Analyzed payment data to find insights and presented the results to the team
- Fast-Indicator: used correlation analysis to test whether payment data could serve as an early economic indicator
- Clustered Thai provinces by credit and debit card usage to find groups with similar payment behavior, improving the model over several rounds
- Presented all three projects to the department's director and senior director

Business Analyst Intern · The Red Carbon
May – Aug 2025

Business Team, data-driven marketing and BI consultancy · Bangkok

- Built and improved Tableau dashboards for client projects, learning Tableau in about 1.5 weeks on top of SQL
- Co-wrote a client Half-Year Report that combined marketing data from multiple sources into trends and strategic recommendations
- Gathered and analyzed business requirements in client meetings at project kickoff
- Researched customer needs and pain points across product categories, and made pitch decks for business pitches
- Joined client consulting sessions to give data-driven advice

PROJECTS

MTMS: Management & Trading System
Personal project · Ongoing

- Full-stack web system for a multi-platform auto-parts e-commerce business, grown from a Streamlit prototype
- FastAPI + PostgreSQL backend for daily sales reports, price management, PDF quotations, SKUs and delivery route planning
- React + TypeScript frontend; deployed on Render and Vercel

FastAPI · React · TypeScript · PostgreSQL · pandas

Sales Visualization
github.com/Rirhcceez

- Explored and visualized sales data in Python and Jupyter, with an interactive Streamlit dashboard

Software Testing & Automation
Coursework

- Automated UI and API tests with Playwright, Robot Framework and Bruno

EDUCATION

Chulalongkorn University
2024 – Present

B.Eng. Computer Engineering and Digital Technology (CEDT), Faculty of Engineering
